## **DETAILED ACTION**

### ***Election/Restrictions***

Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 18-19, directed to the species of embodiments 2-3, are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

## **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The prior art of record do not teach or suggest, in the claimed combination thereof, a data transmission element for downhole components, comprising:

a generally U-shaped annular housing having an inner wall undercut proximate its open end;

a generally U-shaped MCEI [magnetically conductive, electrically insulating] element comprising an inner wall, an outer wall; and an open end, an outer wall recess proximate the open end and an inner wall protrusion defining the open end;

Art Unit: 2832

*the MCEI element being disposed within the annular housing such that the inner wall of the annular housing and the outer wall of the MCEI element form a gap and the recess is generally opposite the undercut forming a pocket wider than the gap there between;*

*an insulated conductor being disposed within the MCEI element;*

*wherein the gap, the pocket, and the MCEI element are filled with a polymer such that the polymer affixes the MCEI element within the generally U-shaped annular housing and the insulated conductor within the MCEI element.*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
